V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. STATEMENT

Novelty (N)	Claims <u>1-9</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-9</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-9</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-9 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a method to determine one or more shortest paths through a portion of a computer network from a source vertex to one or more destination vertices according to a link-state protocol, comprising processing a graph representation of the network portion, the graph representation including nodes and edges representing vertices and connections there between, respectively wherein the processing includes operating on the graph representation according to a Dijkstra-like algorithm, a subset of the Dijkstra-like algorithm processing includes candidate list processing, to maintain and operate upon a candidate list of nodes that have been visited in the Dijkstra-like algorithm processing; and the candidate list processing is optimized relative to standard Dijkstra algorithm processing for the link-state protocol.

No negative opinion has been given because the search report relies on "P" references.

Claims 1-9 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
